Proyecto Herramientas computacionales para la astroinformática

Valeria Alvarez

Motivation

Why is the morphology important?

Presence of bars

Interacting galaxies

Motivation

I haven't data :(
I train with provisional data

Data problem

Galaxy Zoo table 235.286 rows and 127 columns

Not every column is relevant!

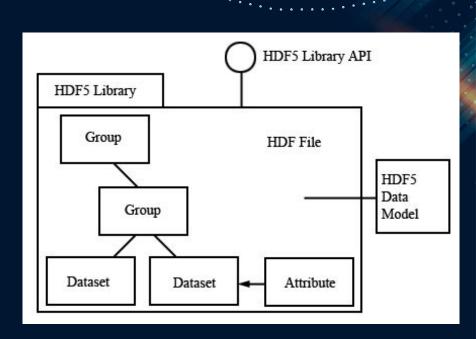

Tipo de columna:									~

Possible solution

Table management!!

HDF5

File format designed to store and organize large amounts of data efficiently

Python code

Converter

H5py:

Thousands of datasets can be stored in a single file, categorized and tagged however you want.

https://docs.h5py.org/en/stable/quick.html#quick

Errors:

Read and write errors

Datatype

Aim

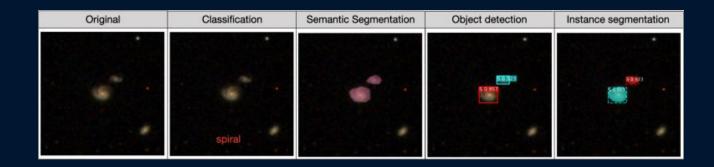

Facilitate the management of large volumes of data

Create a converter from csv tables to hdf5 files

Personal Motivation

Introduction to Deep Learning

HCAI 2023 ∂

Portafolio: Curso Astroinformatica - Magister en Astronomia 2023

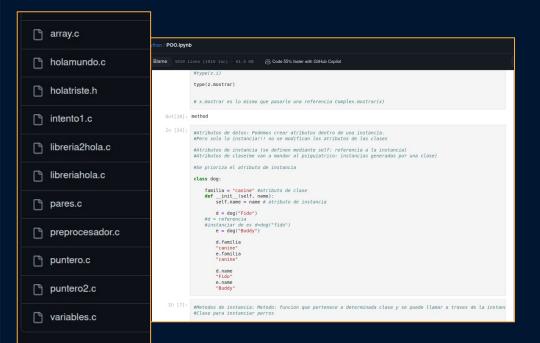

[Codigos]: Contiene codigos en C y Python de ejemplos realizados en clases. Desde las primeras unidades del curso hasta Programacion Orientada a Objetos.

[DiseñoSoftware]: Apuntes y ejemplos de las clases relacionadas a Principios de Diseños de Softwares.

[Profundizacion]: Temas de profundizacion autonoma dados clase a clase.

[Datos]: Apuntes y ejemplos de las clases relacionadas a Gestion, representacion y almacenamiento de datos
